Remarks:

This application was filed on 25-06-2018 as a
divisional application to the application mentioned
under INID code 62.

(54) **WIRELESS COMMUNICATION APPARATUS, WIRELESS COMMUNICATION METHOD,
PROGRAM, AND WIRELESS COMMUNICATION SYSTEM**

(57) Provided is a wireless communication apparatus including an application, a communication control unit for controlling a search process for discovering at least one peripheral wireless communication apparatus and a connection process to a peripheral wireless communication apparatus, and a display control unit for generating a display screen including display of the at least one pe-

ripheral wireless communication apparatus discovered by the search process. The communication control unit starts control of the search process by start of the application, and controls the connection process to a wireless communication apparatus selected on the display screen.
