9 St. Saviourgate
York YO1 8NQ (GB)**

Remarks:

This application was filed on 19-06-2018 as a
divisional application to the application mentioned
under INID code 62.

(54) **MULTITASKING METHOD AND APPARATUS OF USER DEVICE**

(57) A multitasking method and apparatus of a user device is provided for intuitively and swiftly switching between background and foreground tasks running on the user device. The multitasking method includes receiving an interaction to request for task-switching in a state

where an execution screen of a certain application is displayed, displaying a stack of tasks that are currently running, switching a task selected from the stack to a foreground task, and presenting an execution window of the foreground task.
