(57) **ABSTRACT**

A method for operating a terminal for a communication network, the terminal, based on a future route of the terminal, transmitting a reservation request for logging into a radio cell of the communication network along the route via the communication network to a radio cell management server, to be able to log into the requested radio cell as a function of a response of the radio cell management server. A method for operating a radio cell management server, a terminal, a radio cell management server, a vehicle, and a computer program, are also described.
