80639 München (DE)

Remarks:

This application was filed on 28.06.2018 as a divisional application to the application mentioned under INID code 62.

(54) **METHOD AND SYSTEM FOR DETECTING LOCATION OF FIXED WIRELESS ASSET**

(57) A system is disclosed for determining the location of fixed wireless assets (FWAs). The system includes at least one FWA having an asset tracking number, at least one mobile device wirelessly coupled to the FWA via a first communication link, and a database having information that associates people with locations. The mobile device is assigned to one of these people. The system also includes a computer that is coupled to the FWA via a second communication link and to the database. The FWA is configured to forward the data received from the mobile device to the computer along with the FWA's asset tracking number. The computer is configured to determine the location of the FWA based at least in part on the data received from the FWA and the information retrieved from the database.

FIG. 4
